The Link Dining Table

The Link Dining Table is a modular system comprising cast aluminum and steel components and can be adapted for any size table. Table tops are made to order at our Chicago studio in an extensive range of species and finishes as well as whole-log book-matched live-edge slabs. The base is available in stock powder-coat finishes: satin white and patina brown. The base can also be finished in brass or nickel plate or a virtually unlimited range of powder-coat colors for an additional charge.

These tables are well suited for: residential, retail display, hotel lobby and suites, and restaurant applications.

Standard table height: 30".

Custom height legs can be ordered for an additional charge, and require extra lead time.

Please contact AKMD for trade pricing.
